

MULTIMEDIA

To enhance our worship, St. Paul's offers the flexibility of using multimedia in the services. The system incorporates 3 screens, one in each side aisle and one centre which is rear projected. The system has been designed to allow for maximum flexibility, giving us the ability to run video, DVD, camera and computer content on any or all of the screens.

The system is used at most of our services and we are constantly looking at ways to enhance the benefits this can give to our worship.

The system is also used by outside organisations for various presentations and by ourselves for clubs, socials and for screening some of the large sporting events on television for the local community.
